Field of Interest

Web development - Website development refers to the work that goes into building a website. This could apply to anything from creating a single plain-text webpage to developing a complex web application or social network.

Mobile App development - Mobile app development is the act or process by which a mobile app is developed for mobile devices, such as personal digital assistants, enterprise digital assistants or mobile phones.

Skills

Technical Skills:
Angular, Nodejs, TypeScript, Javascript
Ionic, Android Studio, Xcode
MongoDB

Key Soft Skills:

- ✓ **Communication :** Developers need to effectively communicate with customers, colleagues, managers, and employees in non-technical departments in order to do their jobs effectively.
- ✓ **Team Work:** Software developers often work in teams to plan, design, and develop projects. They must collaborate effectively with others, receive feedback constructively, and participate in meetings.
- ✓ **Problem Solving**: The responsibilities of a software developer include fixing problems that computer programmers or users find. They need great problem-solving abilities to ensure that a program works correctly.
- ✓ **Attention to Detail :** The best software developers possess detail-oriented sensibilities that enable them to identify and track small issues in code. They must also possess the ability to shift focus back and forth from the big picture to the minute details.
